## SUMMARY

I am a seasoned professional with extensive leadership experience in project and program management, starting from business/system analysis and through execution, across a variety of domains. My primary expertise is focused on business performance optimization by using modern state-of-the-art methodologies and tools. An approach to building efficient project management frameworks and proper workflows suitable for specific projects is based on fast knowledge acquisition and building strong relations with stakeholders and team members.

Developing with the industry, I acquired a unique cross-industry experience of managing diverse project teams in fields such as management consulting, life sciences, software development, publishing, mechanical engineering, residential development, oil and gas. My expertise covers project/program management, product development life cycle management, business/system analysis and requirements management, metrics and KPIs design and implementation for data-driven projects, leading organizational changes, business process design/optimization, intraorganizational communications, and AI/ML/Data science-based methodologies.

I have successfully completed 20+ long-term enterprise-scale projects with average annual project budgets of \$10M+, including 3 SAP, 3 CRM, and 2 Oracle implementations managed end-to-end, built project/program management teams of up to 100 individual contributors.

# EXPERIENCE

## **GNSI Inc.**, San Francisco, CA, USA

### **Project/Program Manager**

December 2018 - Current

I managed numerous consulting and software development projects of various complexity related to ERP, CRM, and workflow management systems as well as application prototyping, database design, and AI/ML development.

## **Sanford Burnham Prebys Medical Discovery Institute**, La Jolla, CA, USA

### **Project Manager**

January 2016 - July 2018

Developed and implemented a cloud-based (Google Cloud Services) high-throughput image recognition AI/ML and statistical modeling pipeline.

## **Krusnik**, Moscow, Russia

### **Project Director**

January 2010 - December 2015

I played a multifunctional leadership role covering both project management and application development domains, including managing enterprise-scale web development and software engineering projects and managing consulting projects in process modeling and regulation.

## **Hearst Media**, Moscow, Russia

### **Senior Project Manager**

January 2008 - December 2009

In this role of a Senior project manager I oversaw and managed multifunctional teams of 18 business units of the Hearst Publishing branch in Russia including planning, budgeting, and forecasting of business activities/results for regional business units on an annual, quarterly, and monthly basis, designed execution plans' design and implementation.

I managed a full cycle of playbook, regulations, and SOP development and implementation.

**PIK Group**, Moscow, Russia

**Head of Strategic Planning**

February 2007 - January 2008

In this role, I was responsible for strategic model development and support for a pre-IPO process (PIK:LI) of the biggest to date residential development and construction company in Russia. I provided leadership in business units KPI, regulations, and SOP design.

**Consulting company PACC**, Moscow, Russia

**Project Manager**

June 2004 - January 2007

I provided leadership and problem domain expertise in fields such as: business process design and implementation, commercial rules and regulations, setup for SAP installation, KPI/BSC design and implementation, reorganization, restructuring, non-core assets, and workforce optimization, CRM implementations.
