## OBJECTIVE

Seeking myself as a software engineer with the computer science major to experience and build the professionalism in a better company and team. Passionate and motivated to have an opportunity for growing up myself with the company.

## EDUCATION

### Bachelor of Science (Computer Science) | Jacksonville State University

August 2014 – May 2021 | Jacksonville, Alabama

- Concentration: General (Human-Computer interaction, Management of information Security/Forensic, Computer Graphics, Database System, Computer Networking)

## WORK EXPERIENCE

### Resident Assistant | Jacksonville State University

July 2020 – May 2021

- Provided services and maintained the dorms to support the students for a year.

### Computer Technician (Sergeant) | Republic of Korea Air Force

January 2017 – December 2018

- Installed and maintained hardware and software for two years.
- Monitored the military base's intranet server for an unauthorized access or possible hack.
- Created and reported official documents for my government.

## TECHNICAL SKILLS

- Back-end (Java, Python, C++, Node. js)
- Front-end (HTML, JavaScript)
- Microsoft office programs
- Database System (MySQL)
- Hardware (Knowledge of parts and specs)
- Korean

## ACTIVITIES

- JSU International House Program, member, August 2014 – May 2020
  - Represented about my country and the program to the other school or public organization.
- ISO (International Student Organization), member, August 2014 – May 2020
  - Supported international students in the campus and shared my experiences.
